EverFRESH®

Creating an atmosphere for success is now easier than ever.

When transporting perishables, time is everything. Shippers need to keep cargo fresh throughout its journey and can't afford to be slowed down by resealing leaks. For years, our customers have turned to our EverFRESH® controlled atmosphere (CA) system for a more efficient alternative to air freight. Now we're building on that success by introducing a new version that's more affordable, less complex and easier to service than the competition.

By allowing for the precise management of gases within shipping containers, the EverFRESH CA system slows the ripening process, enabling the fresh transport of perishables on longer voyages.

Carry the widest range of fresh cargoes possible

Enable longer voyages and transit life for your fresh products

Experience reduced sensitivity to box leakage with positive pressure

Maintain atmosphere at precise setpoints for different applications

- O₂ setpoints: 3-17%
- CO₂ setpoints: 2-19%

Mitigate product degradation and spoilage

Hinder mold growth

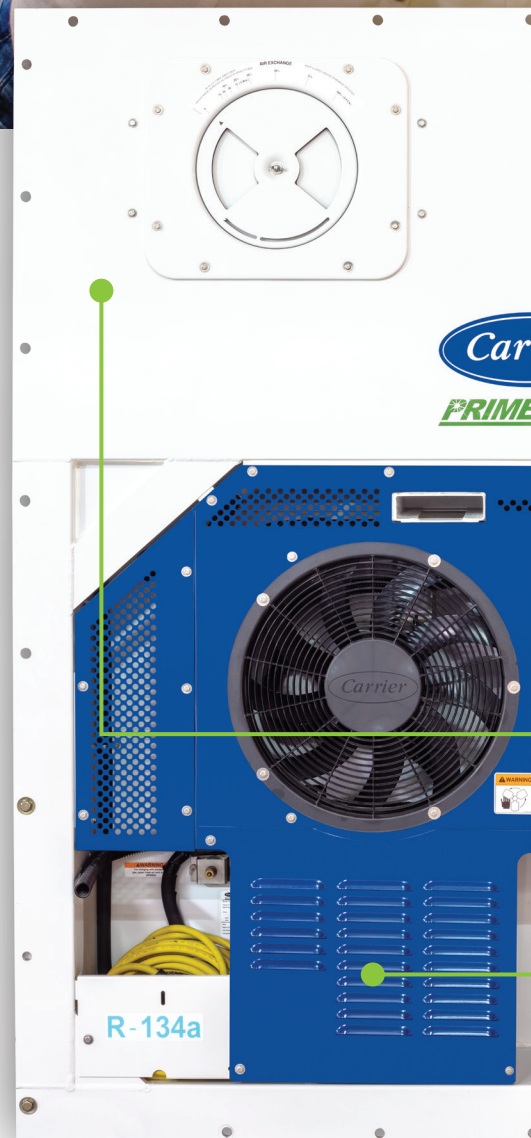

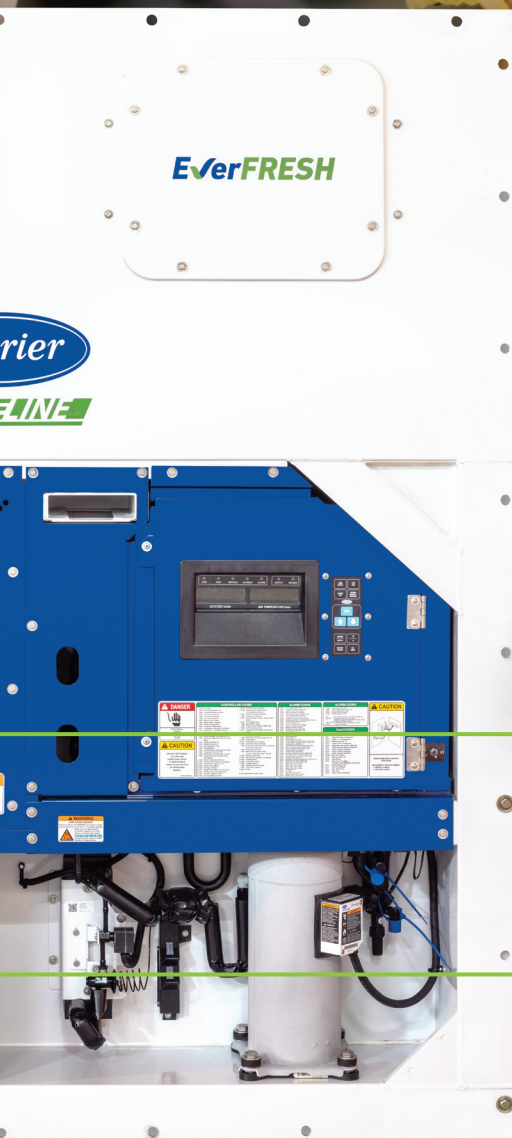

Monitor and control your system easily with the same sensor package and controls as XtendFRESH™

Simplify pre-trip inspection with greater serviceability

EverFRESH®

A proven way to take your cargo further. Better by design.

Our latest update improves upon the proven design of the EverFRESH CA system with optimized components that provide even greater benefits.

N₂ Separator

- Receives dry/clean air from system
- Air passes through hollow fiber module, which separates O₂ and N₂ – delivering N₂ into container

Air Compressor

- Provides compressed air to the N₂ membrane
- Air is conditioned through a series of filters, water separator and coalescing loop

A better way to keep things fresh.

As the industry's first proven active CA design, EverFRESH has been helping shippers optimize operations for years. Our latest update continues that tradition and delivers the performance you've come to expect, along with design improvements for greater serviceability, enhanced reliability and a lower cost.

Contact your dealer today to learn how you can start creating a better atmosphere for success.
